### **DETAILED ACTION**

1. This is the first office action for Application No. 10/723,262, Slide rail, file : on 11/25/03. This application contains two claims numbered 1-2.
2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.
3. The IDS filed on 11/25/03 has been considered by examiner.
4. Applicant is reminded that the abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

### ***Claim Rejections - 35 USC § 112***

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitations "the outside faces" in lines 2-3; "the inside faces" lines 4 and 9; and "the outside" line 5. There is insufficient antecedent basis for this limitation in the claim.

***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over JP No. 2001001811 to Izumi (of record) in view of US Patent no. 6,131,871 to Bernhardt et al.

Izumi discloses the invention substantially as claimed except for the limitation that a stay is provided where both ends of which are supported on the inside faces of both inside rails and the stay is provided with a regulating mechanism. Izumi appears to teach a stay 16 (Fig. 2) where both ends of which are supported on the outside faces of the inner rails; and the stay is provided with regulating mechanism (17, 19) for regulating and maintaining a distance between both the inside rails.

Bernhardt et al. teaches a stay (38) where at both ends of which are supported on the inside faces of both inside rails for maintaining the spans and distance between the inside rails.

It would have been obvious to a person of ordinary skill in the art at the time the invention was made to provide a stay on the inside faces of both inside rails as taught in

Art Unit: 3632

Bernhardt et al. that improved maintaining the distance between the inside rails would be expected. Nevertheless, to provide a stay on the inside faces of the inside rails would also have been obvious as mechanical design because it is well known that a stay on the inside faces of the both inside rails will reduce the size and configuration as well as will provide a strong and better holding while maintaining the distance between the inside rails.

***Allowable Subject Matter***

7. Claim 2 is rejected, but would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

***Conclusion***

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

3,718,263 to Strecke

5,902,013 to Hong

5,328,321 to Moffett et al.

3,252,545 to Quayle

The above patents disclose various types of slide rails having stay provided on inside faces of the rails.
